EDUCATION

Rensselaer Polytechnic Institute (RPI)

GPA 3.82 — B.S. in Computer Science, Minor in Information Technology & Web Science

Troy, NY

Aug 2023 - Dec 2025

Villanova University

GPA 3.83 — B.S. in Computer Science (Transferred)

Villanova, PA

Aug 2022 - May 2023

Relevant Coursework: Database Systems, Operating Systems, Network Programming, Principles of Software, Computer Graphics, Programming Languages, Software Design & Documentation, Computer Organization, Data Structures, Algorithms

SKILLS

Languages: Python, C#, Java, SQL, C/C++, HTML, CSS, JavaScript/TypeScript, Dart, PHP

Libraries/Frameworks: React, Node.js, Flutter, FastAPI, Django, Next.js, Drizzle

Tools/Software: Visual Studio Code, Unity, Blender, Git, Looker, Vercel, Firebase, Omni Analytics, Supabase, AWS

WORK EXPERIENCE

Hiveclass | MySQL, SQLite, ClickHouse, TypeScript, Drizzle ORM, Looker, Omni Analytics

New York, NY

Backend Engineer

Jun 2023 - Present

- Leading the design of a normalized database schema and coordinating a full data migration using TypeScript and Drizzle ORM to support an overhauled product with 25+ tables, resolving technical debt and ensuring strict relational integrity
- Establishing the company's first data analytics ELT pipeline using Python, Sling, ClickHouse, and Omni Analytics to aggregate 2M+ rows of business data from multiple production databases into a user-friendly interface for executives
- Developing 20+ Express.js endpoints to support product features, including a teacher portal for the retrieval of complex data

PERSONAL PROJECTS

Plancake | Next.js, Django, Supabase, PostgreSQL, AWS

Troy, NY

Technical Lead

Sep 2024 - Present

- Co-leading the development of an open-source event planning platform while individually architecting a robust Django backend with a custom authentication system, facilitating 90+ events for 240+ unique users during its beta launch phase
- Administering server deployment and CI/CD using AWS EC2, GitHub Actions and Vercel to sustain high site uptime
- Directing an agile development cycle and managing documentation for seamless communication and consistent progress

ChatKeyPT | Dart, Flutter, Firebase

Roslyn, NY

Frontend Engineer

May 2024 - Aug 2024

- Created an open-source OpenAI interface that leverages a pay-as-you-go model to minimize user costs for premium model usage; successfully launched to the iOS App Store and achieved 600+ downloads with 250+ registered user accounts
- Built the application using a single Flutter codebase for both iOS and web, implementing a highly reactive user interface that integrates with a secure Firebase backend for user authentication and persistent chat data storage

Project CARPI | Python, FastAPI, MySQL

Troy, NY

Backend Engineer

Dec 2023 - Dec 2025

- Architected the project's first relational database foundation for a four-year course planner using MySQL and FastAPI, collaborating closely with the project lead to normalize disorganized course data for long-term scalability
- Developed a search algorithm leveraging SQL and Regex to support flexible queries using acronyms and abbreviations
- Standardized Git workflows for a team of 10 developers to ensure proper organization across a large-scale student project

Super Golf | C#, Unity, Blender

Roslyn, NY

Software Engineer | Solo Project

Jan 2022 - Feb 2022

- Engineered a physics-based local multiplayer game in Unity and C#, launching to itch.io and garnering 250+ unique players
- Implemented game logic using object-oriented C# programming to manage multi-user state, physics predictions, and responsive GUIs while creating custom shaders to support the experience across 7 golf holes and around 1 hour of playtime
- Maintained the project through a post-launch update, implementing accessibility features and bug fixes for long-term stability

LEADERSHIP EXPERIENCE

Google Developer Groups on Campus RPI

Troy, NY

Founding Treasurer

Sep 2024 - Apr 2025

- Co-founded the revived Google Developer Groups on Campus chapter at RPI, navigating the university registration process and establishing a sustainable club structure that has since been passed on to a completely new executive board
- Orchestrated large-scale technical events, including a successful DevFest with 18 guest speakers and over 200 attendees
- Directed club operations and financial logistics, collaborating on strategic marketing initiatives to expand campus presence
